HOW TO TAKE A RISK

Risks can be weighed, as on a scale.

If the risk is greater than the benefit, do not take the risk.
If you stand to lose more than you will gain by taking the risk, then the risk is greater than the benefit, and not worth taking. You are gambling. You should not take the risk.

But if the benefit outweighs the risk, you should take the risk.
If you stand to gain more by taking the risk than you would lose, then have faith and take the risk. The risk is worth taking.
